

Unroasted Molybdenum Concentrates

1. Introduction

Molecular Formula: MoS_2

Molecular weight: 160.07

Appearance: black, lead-silvery gray

2. Specification

We could provide the products with Mo 40% min and other impurities content as per customer's requirements.

3. Packaging

1000kg big bags or 250kg steel drums on pallets.

In big bags

In steel drums

4. Application

As an alloy in the production of steel and for the production of ferromolybdenum.
